03 — CAPABILITIES

FABRICATION

A dedicated sheet-metal operation handles low-volume parts, assemblies and prototypes. Flexible laser, turret and brake equipment keeps tooling cost low and lead times short.

5-AXIS	4	MINIMAL
LASER CELL	CNC PRESS BRAKES	TOOLING INVESTMENT

EQUIPMENT AND PROCESSES

- Two turret punches: a CO2 laser / turret combination and a standalone CNC turret punch
- 5-axis laser cell
- Four CNC press brakes, including multi-axis and 7-axis
- Robotic and manual MIG, TIG and laser welding
- PEM nut and fastener insertion, plus in-house powder coating

MARKETS SERVED

- Appliance and food service
- Industrial controls and enclosures
- Off-road vehicles and agriculture
- Medical
- HVAC
- Low-volume automotive and prototypes

> Anchor balances tooling cost against piece price to give the lowest total cost for the program.
